INCLUDE-CE

Garantizando el fácil acceso y posesión de dispositivos tecnológicos.

Reducirá la "brecha digital" entre las personas migrantes en lo que respecta a la inclusión digital, derivada de la desigualdad de acceso a la utilización de la tecnología digital, así como de su coste.

Se fomentará la colaboración entre sectores, especialmente entre los agentes de la industria, como técnicos y expertos en TI, que serán llamados voluntarios para reparar los ordenadores donados por las organizaciones de TI asociadas que requieran cierto nivel de reparación y limpieza de datos cuando sea necesario.

Inclusion and Digital Empowerment of Migrants and Ethnic Minorities Through Circular Economy

THE AIM

The aim of Include-CE is to reduce the digital divide in technological skills, readiness, and resilience of migrants and ethnic minorities for collaboration, social and labor inclusion through the philosophy of a circular economic system.

How will the circular economy be a plus for the beneficiaries?

By taking action to promote the ideology of circular economy in reducing digital waste by promoting sustainable consumption and production through re-use of inactive, underutilised digital devices, upgrading and refurbishing of fairly damaged devices.

How will INCLUDE-CE empower the beneficiaries?

By favouring the process of social and labor inclusion of migrants and ethnic minorities using Information and Communication Technologies.

By promoting their labor insertion through tailored employability training

By promoting the digital literacy of migrants and ethnic minorities through structured training itineraries adapted to their needs

A win-win for society and the target groups
